

NIAS Toolset - NAPLAN Results Reporting Validation

The NIAS Toolset produces a number of reports for a variety of purposes. Please find below a list of report produced by the tool.

A. QA Reports

Reports are generated in the QA folder when using the -QA option in NIAS

| 1 | itemPrinting.csv |
|-----------------------|--|
| Purpose | <ul style="list-style-type: none">• Reports one row of response data per student per test item presented within a NAPLAN test• Detailed information which can be used for ingest into data analysis systems |
| What to expect | <ul style="list-style-type: none">• Very large report• This report excludes writing |
| Look out for | |

| 2 | itemWritingPrinting.csv |
|-----------------------|--|
| Purpose | <ul style="list-style-type: none">• Reports one row of response data per student per test item presented within a NAPLAN test for the Writing domain only• Detailed information which can be used for ingest into data analysis systems |
| What to expect | <ul style="list-style-type: none">• Very large report• Includes a column for each subscore |
| Look out for | |

| 3 | orphanEvents.csv |
|-----------------------|--|
| Purpose | <ul style="list-style-type: none">• Reports any NAPStudentEvents whose corresponding school does not have a SchoolInfo object in the data set (no details have been provided about the school, or the school does not exist) |
| What to expect | <ul style="list-style-type: none">• Ideally this report should be empty |
| Look out for | <ul style="list-style-type: none">• Any entry in this report needs to be investigated |

| 4 | orphanScoreSummaries.csv |
|-----------------------|---|
| Purpose | <ul style="list-style-type: none">• Reports any score summaries whose corresponding school does not have a SchoolInfo object in the data set (no details have been provided about the school, or the school does not exist) |
| What to expect | <ul style="list-style-type: none">• Ideally this report should be empty |
| Look out for | <ul style="list-style-type: none">• Any entry in this report needs to be investigated |

| 5 | orphanStudents.csv |
|-----------------------|--|
| Purpose | <ul style="list-style-type: none">• Reports any students whose corresponding school does not have a SchoolInfo object in the data set (no details have been provided about the school, or the school does not exist) |
| What to expect | <ul style="list-style-type: none">• Ideally this report should be empty |
| Look out for | <ul style="list-style-type: none">• Any entry in this report needs to be investigated |

| 6 | qaCodeframeCheck.csv |
|-----------------------|--|
| Purpose | <ul style="list-style-type: none"> • Reports all tests, testlets and items referenced in responses that are not included in the Codeframe |
| What to expect | <ul style="list-style-type: none"> • Ideally this report should be empty |
| Look out for | <ul style="list-style-type: none"> • Tests / Testlets / TestItems should not be responded to if they are not part of the codeframe: any entry in this report needs to be investigated |

| 7 | qaSchools.csv |
|-----------------------|---|
| Purpose | <ul style="list-style-type: none"> • Reports one row per school, summary of school information as well as data from student registration information and results information • Includes total registered students and summary of student count by Year level • Includes total test attempts by year level and domain • Includes counts of students by participation status • Includes count of disruptions |
| What to expect | <ul style="list-style-type: none"> • All schools for the sector should be listed • Can check response counts against expected students registered per test level |
| Look out for | <ul style="list-style-type: none"> • Discrepancies between number of students registered at each year level for each test domain; reasonable number of students exempt, absent, experiencing disruptions etc. |

| 8 | systemCodeframe.csv |
|-----------------------|--|
| Purpose | <ul style="list-style-type: none"> • Reports all Items against Testlets and Tests in the Codeframe • Includes Item difficulty, correct answer, item type • Detailed information which can be used for ingest into data analysis systems |
| What to expect | <ul style="list-style-type: none"> • Large report • One row for every Item in Codeframe |
| Look out for | |

| 9 | systemGuidCheck.csv |
|-----------------------|---|
| Purpose | <ul style="list-style-type: none"> • Reports any GUID that references the wrong kind of object, or doesn't reference any object included in the data set |
| What to expect | <ul style="list-style-type: none"> • Ideally this report should be empty |
| Look out for | <ul style="list-style-type: none"> • If any data appears, report will show the correct kind of object the GUID should point to. Any entry in this report needs to be investigated. |

| 10 | systemResponses.csv |
|-----------------------|--|
| Purpose | <ul style="list-style-type: none"> • Reports one row for every student per school registered for a test domain, along with information on their response if available • Includes participation code, path taken for domain and raw score • Detailed information which can be used for ingest into data analysis systems |
| What to expect | <ul style="list-style-type: none"> • Very large report • Will include a row for every student registration for all tests, but not all rows will contain responses |
| Look out for | |

| 11 | systemScoreSummaries.csv |
|-----------------------|--|
| Purpose | <ul style="list-style-type: none"> • Reports a row for every score summary included in the data set, sorted by school, domain and year level |
| What to expect | <ul style="list-style-type: none"> • Use to check expected year levels • 2017/18 writing may be included more than once, as score summaries are per test rather than test domain |
| Look out for | <ul style="list-style-type: none"> • Any school without an entry for a domain–year level pair (other than Yr 3 Writing) |

B. QA\Error_reports

Reports are generated in this folder as a result of using the -QA option in NIAS

| 12 | itemExpectedResponses.csv |
|-----------------------|---|
| Purpose | <ul style="list-style-type: none"> • Reports one row per student per test • Presently up to 3 Testlets per test • Lists the number of items per testlet that a student is expected to have answered (according to the codeframe), the number of correct/incorrect/not attempted and not presented items in that testlet; and any discrepancies between the number of items expected and referenced in the response |
| What to expect | <ul style="list-style-type: none"> • A row per student response per test • At least one testlet per test populated |
| Look out for | <ul style="list-style-type: none"> • No items in the Not In Path category • Listings of discrepancies (“Expected not found, Found not expected”) to be empty square brackets (“[]”) • Number of expected items per testlet to equal the correct/incorrect/not attempt/not presented items per testlet |

| | |
|-----------------------|--|
| 13 | systemItemCounts.csv |
| Purpose | <ul style="list-style-type: none"> • Reports the number of times an item is in a response at all |
| What to expect | <ul style="list-style-type: none"> • A row for every item in the codeframe |
| Look out for | <ul style="list-style-type: none"> • High counts for substitute items • Zero counts for any item |

| | |
|-----------------------|--|
| 14 | systemObjectFrequency.csv |
| Purpose | <ul style="list-style-type: none"> • Reports for every student the number of events they have recorded, the number of events with participation status P/R/S (Participated/Refused/Sanctioned Abandonment)—which are expected to have produced responses; and the number of responses • Also includes P/R/S events without responses, and responses without P/R/S events |
| What to expect | <ul style="list-style-type: none"> • A row for every unique student in the data set, independent of school |
| Look out for | <ul style="list-style-type: none"> • Check for discrepancies the number of events with participation status P/R/S and the number of responses • Check for any instances of a student participating in more than five distinct events (as identified by test level plus test domain) |

| | |
|-----------------------|--|
| 15 | systemParticipationCodeImpacts.csv |
| Purpose | <ul style="list-style-type: none"> • Reports tests for which the response contents are unexpected based on the participation code |
| What to expect | <ul style="list-style-type: none"> • Ideally this report should be empty |
| Look out for | <ul style="list-style-type: none"> • “Adaptive pathway without student undertaking test” if: <ul style="list-style-type: none"> ○ participation code = S, P ○ PathTakenForDomain or ParallelTest are not empty • “Scored test with status other than P or R” if: <ul style="list-style-type: none"> ○ participation code ≠ P, R ○ RawScore or ScaledScore is not empty • “Non-zero score with status of R” if: <ul style="list-style-type: none"> ○ participation code = R ○ RawScore is not empty ○ RawScore ≠ 0 • “Unscored test with status of P or R” <ul style="list-style-type: none"> ○ participation code = P, R ○ RawScore or ScaledScore is empty |

| | |
|-----------------------|---|
| 16 | systemRubricSubscoreMatches.csv |
| Purpose | <ul style="list-style-type: none"> • Reports item/response pairs in which the rubric types and subscore types do not match |
| What to expect | <ul style="list-style-type: none"> • Ideally this report should be empty |
| Look out for | <ul style="list-style-type: none"> • Where there are SubscoresNotDefined which are subscores with no corresponding rubric, or that are not in the list of 10 expected rubric names • Where there are RubricsNotScored which are rubrics with no corresponding subscore in the item response |

| | |
|-----------------------|--|
| 17 | systemParticipationCodeItemImpacts.csv |
| Purpose | <ul style="list-style-type: none"> • Reports items for which the item responses are unexpected based on the participation code, focusing on score at test level, testlet level and item level |
| What to expect | <ul style="list-style-type: none"> • Ideally this report should be empty |
| Look out for | <ul style="list-style-type: none"> • “Response captured without student writing test” if: <ul style="list-style-type: none"> ○ participation code ≠ S, P ○ Response is not empty • Scored test with status other than P or R if: <ul style="list-style-type: none"> ○ participation code ≠ P, R ○ TestletScore, ItemScore or Subscores are not empty • Non-zero Scored test with status of R if: <ul style="list-style-type: none"> ○ Participation code = R ○ TestletScore, ItemScore or Subscores is not empty ○ TestletScore, ItemScore or Subscores ≠ 0 • Missing testlet score with status of P or R if <ul style="list-style-type: none"> ○ Participation code = P, R ○ TestletScore is empty ○ This error is not as serious • Unscored test with status of P or R <ul style="list-style-type: none"> ○ Participation code = P, R ○ ItemScore is empty • Unscored writing test with status of P <ul style="list-style-type: none"> ○ ParticipationCode = P ○ TestDomain = Writing ○ Subscore is empty |

| | |
|-----------------------|--|
| 18 | systemTestAttempts.csv |
| Purpose | <ul style="list-style-type: none"> • Reports all sanctioned abandonments for students in schools for sector |
| What to expect | <ul style="list-style-type: none"> • Small number of rows |
| Look out for | |

| | |
|-----------------------|--|
| 19 | systemTestCompleteness.csv |
| Purpose | <ul style="list-style-type: none"> • Reports for each test per year level per school in sector counts for Present and Sanctioned Abandonment, and discrepancies between attempts (events with status P or R) and responses |
| What to expect | <ul style="list-style-type: none"> • Row per school per domain per test level |
| Look out for | <ul style="list-style-type: none"> • List of attempts with no response should be empty for all rows • List of responses with no attempts should be empty for all rows • P_Attempts + S_Attempts + R_Attempts should add up to Responses |

| | |
|-----------------------|--|
| 20 | systemTestIncidents.csv |
| Purpose | <ul style="list-style-type: none"> • Reports all non-empty test disruptions by student, school and domain |
| What to expect | <ul style="list-style-type: none"> • Small number of rows for disruptions impacting individual students • Larger number of rows for disruptions impacting cohort of students |
| Look out for | <ul style="list-style-type: none"> • Schools with high proportion of disruption |

| | |
|-----------------------|--|
| 21 | systemTestTypeImpacts.csv |
| Purpose | <ul style="list-style-type: none"> • Reports tests for which the response contents are unexpected based on the test domain |
| What to expect | <ul style="list-style-type: none"> • Ideally this report should be empty |
| Look out for | <ul style="list-style-type: none"> • “Writing test with adaptive structure” if <ul style="list-style-type: none"> ○ TestDomain = Writing ○ PathTakenForDomain or ParallelTest is not empty • “Non-Writing test with non=adaptive structure” if <ul style="list-style-type: none"> ○ TestDomain ≠ Writing ○ PathTakenForDomain or ParallelTest is empty |

| | |
|-----------------------|---|
| 22 | systemTestTypeItemImpacts.csv |
| Purpose | <ul style="list-style-type: none"> • Reports items for which the item responses are unexpected based on the test domain, focusing on score at test level, testlet level and item level |
| What to expect | <ul style="list-style-type: none"> • Ideally this report should be empty |
| Look out for | <ul style="list-style-type: none"> • “No subscores for Writing Test” if <ul style="list-style-type: none"> ○ TestDomain = Writing ○ Subscores is empty • Subscores for non-writing test if <ul style="list-style-type: none"> ○ TestDomain ≠ Writing ○ Subscores is not empty |

C. School Reports

School_reports: Reports are generated in this folder as a result of using the -report option in NIAS. For each school all 3 reports will be generated.

| 23 | schoolDomainScores.csv |
|-----------------------|--|
| Purpose | <ul style="list-style-type: none">Report contains line per student in the school for each domain containing domain band, raw and scaled scores |
| What to expect | <ul style="list-style-type: none">One record for each test where response is available |
| Look out for | <ul style="list-style-type: none">Zero scores if Participation = RefusedBlank/Null if Participation = Sanctioned Abandonment |

| 24 | schoolParticipation.csv |
|-----------------------|---|
| Purpose | <ul style="list-style-type: none">Reports participation status for each student for each domain within the school |
| What to expect | <ul style="list-style-type: none">One row per student |
| Look out for | |

| 25 | schoolScoreSummaries.csv |
|-----------------------|---|
| Purpose | <ul style="list-style-type: none">Reports for each year level and domain averages for School, Jurisdiction and NationalReports top and bottom national 60% |
| What to expect | <ul style="list-style-type: none">One row per test name (made up of test level and domain name) for the school |
| Look out for | |

D. System Reports

System_reports: Reports are generated in this folder as a result of using the -report option in NIAS. For each school all 3 reports will be generated.

| 26 | systemCodeframe.csv |
|-----------------------|---|
| Purpose | <ul style="list-style-type: none">Reports for each year level and domain, Testlet information including Name, Location, Node, Maximum Score and Items, including difficulty Maximum score, difficulty and Item Type |
| What to expect | |
| Look out for | |

| 27 | systemDomainScores.csv |
|-----------------------|---|
| Purpose | <ul style="list-style-type: none">Reports raw and scaled scores for each student, year level and domain |
| What to expect | <ul style="list-style-type: none">One row per student per test domain |
| Look out for | |

| 28 | systemObjectsCount.csv |
|-----------------------|---|
| Purpose | <ul style="list-style-type: none">Summary report showing counts for: schools, students, test events, student responses, tests, testlets, test items, codeframes & score summaries |
| What to expect | |
| Look out for | |

| | |
|-----------------------|---|
| 29 | systemParticipation.csv |
| Purpose | <ul style="list-style-type: none"> Reports participation codes for each student in each school by domain |
| What to expect | |
| Look out for | |

| | |
|-----------------------|---|
| 30 | systemSchools.csv |
| Purpose | <ul style="list-style-type: none"> Reports school registration details, including school type, sector, principal name and websites |
| What to expect | |
| Look out for | <ul style="list-style-type: none"> Student count will only be populated if it has been submitted in Registration |

| | |
|-----------------------|--|
| 31 | systemScoreSummaries.csv |
| Purpose | <ul style="list-style-type: none"> Reports for each school the Local Test Name and averages for School, Jurisdiction and National |
| What to expect | |
| Look out for | |

| | |
|-----------------------|--|
| 32 | qldStudent.csv* |
| Purpose | <ul style="list-style-type: none"> Basic registration information for each student by school in TAA |
| What to expect | |
| Look out for | |

| | |
|-----------------------|---|
| 33 | qldStudentScore.csv* |
| Purpose | <ul style="list-style-type: none"> Reports Student ID Domain, Year level, raw and Scaled scores, Band Participation status for each student (XXX in School/TAA?) |
| What to expect | |
| Look out for | |

| | |
|-----------------------|---|
| 34 | qldTestData.csv* |
| Purpose | <ul style="list-style-type: none"> Reports item information per year level and domain, includes sequence and item type |
| What to expect | |
| Look out for | |

*Note these 3 reports are Queensland specific templates.

E. ISR Printing

ISR_printing: Reports are generated in this folder as a result of using the -isrprint option in NIAS. A report will be generated for each available year level (3,5,7,9)

| 35 | isrprint_yrXX.csv |
|-----------------------|--|
| Purpose | <ul style="list-style-type: none">• Reports for student including local ID, name, scores for each domain, mean scores• Can be used to facilitate merge with paper records to support printing of hardcopy ISRs. |
| What to expect | <ul style="list-style-type: none">• A record for each student |
| Look out for | |

F. Reports available via NAPRRQL user interface

These reports are available by the NIAS web interface following the ingest of data (by running NIAS - ingest). User selects a school from drop down list. Reports are viewable by selecting required tab. Basic information about the selected school is also available.

| 36 | School Score Summary |
|-----------------------|---|
| Purpose | <ul style="list-style-type: none">• Displays for selected school all domains for all year levels:<ul style="list-style-type: none">○ School Average○ Jurisdiction Average○ NationalAverage○ Top National 60%○ Bottom National 60% |
| What to expect | <ul style="list-style-type: none">• Filters available for Year level• Can drill down on individual rows to view information graphically• Report can be downloaded as csv file |

| 37 | Student Domain Scores |
|-----------------------|---|
| Purpose | <ul style="list-style-type: none">• Displays for selected school scores for each student for each domain<ul style="list-style-type: none">○ Raw score○ Scaled Score○ Scaled Score Std Error○ Domain Band○ Proficiency |
| What to expect | <ul style="list-style-type: none">• Filters available for Year level and domain• Can drill down on individual rows to view information graphically• Report can be downloaded as csv file |

| 38 Student Participation | |
|--------------------------|--|
| Purpose | <ul style="list-style-type: none"> Displays participation codes for each student for each domain |
| What to expect | <ul style="list-style-type: none"> Filters available for Year level Can drill down on individual rows to view each domain test details as well as exemption, disruptions and PNP codes Report can be downloaded as csv file |

| 39 NAPLAN Codeframe | |
|-----------------------|--|
| Purpose | <ul style="list-style-type: none"> Displays for each year level and domain: <ul style="list-style-type: none"> Subdomain Node Testlet Name Item Name |
| What to expect | <ul style="list-style-type: none"> Can drill down on individual rows to view further information on Content, Writing Rubric and Scoring |
